

# Altiv™ Series

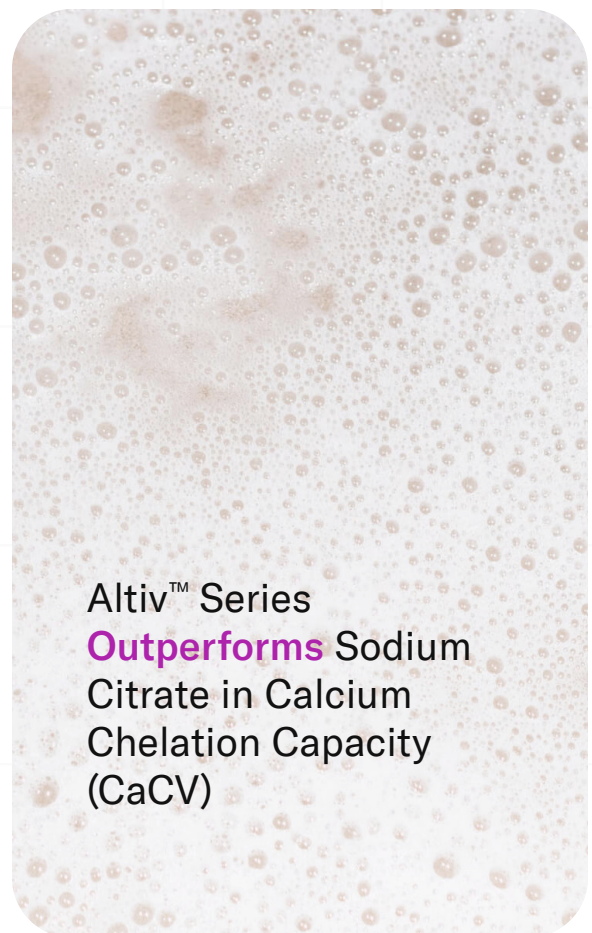

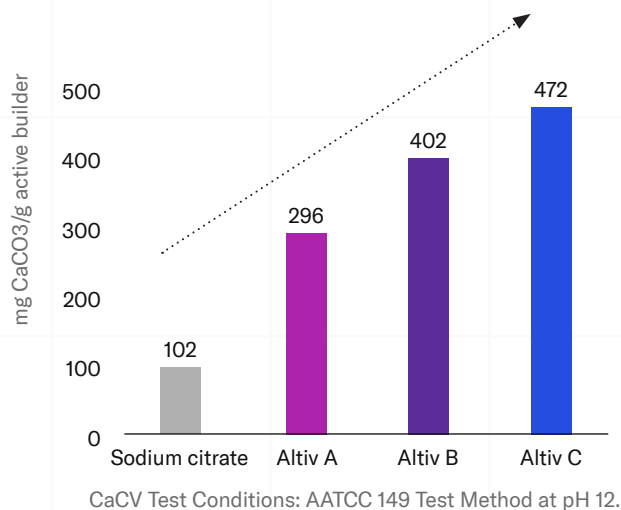

## Bio-Based Detergent Builders

Locally and sustainably produced to help maximize cleaning performance.

The Altiv™ series are organic acid-, bio-based detergent builders that excel in alkaline applications and can effectively sequester hard water cations, such as calcium and magnesium, to improve cleaning performance. This series can be used as a complement to or replacement for traditional chelating agents or detergent builders, such as citric acid.

### Product Attributes

- Applicable in alkaline detergent formulations, such as bottle and ware washing, dishwashing, & laundry
- Superior cation control over a wide pH range
- Non-toxic & biodegradable
- NTA-, formaldehyde-, and cyanide-free
- Locally manufactured in USA using low-carbon to carbon-negative, novel chemienzymatic process
- Enables lower overall chemical usage, costs, and GHG emissions

### About Solugen

Solugen is a bio-based specialty chemicals manufacturer and supplier whose mission is to decarbonize the chemicals industry by revolutionizing the way chemicals are made for use across a variety of markets and applications.
